IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in

the application:

Please amend the claims as follows:

1. – 39. (Canceled)

40. (Previously presented) A method, comprising:

a) assigning an identifier for a data object and storing said

identifier, said data object stored in a database;

b) providing said identifier in response to a request requesting one

or more identifiers of one or more data objects to be deleted, locking said

identifier, and confirming that content of an archived version of said data object

corresponds to said data object's content; and,

c) deleting said data object from said database and deleting said

identifier.

41. (Previously presented) The method of claim 40 further comprising marking

said data object as available for deletion after said version of said data object

has been archived.

42. (Previously presented) The method of claim 40 wherein said storing of

said identifier further comprises storing said identifier into a relational database.

-2-

Atty. Docket No.: 6570P057

App. No.: 10/712,472

43. (Previously presented) The method of claim 40 further comprising

determining if a computing system that uses information stored in said database

is currently sufficiently under-utilized to permit performing a), b) and c).

44. (Previously presented) The method of claim 40 further comprising

repeatedly performing the following:

issuing a request to a software module that performs said storing and

said locking, said request requesting one or more identifiers of data

objects marked for deletion and deleting a corresponding one or more

data objects identified by said one or more identifiers.

(Previously presented) The method of claim 44 wherein the number of 45.

said one or more identifiers is limited to a value specified by an administrator.

46. (Previously presented) The method of claim 44 wherein said one or more

data objects are within the same logical partition of said database.

47. (Previously presented) The method of claim 40 further comprising:

ai) assigning and storing a second identifier for a second data

object, said second data object stored in a database;

bi) locking said identifier and confirming that content of an archived

version of said second data object corresponds to said second data object's

content; and,

App. No.: 10/712,472 Amdt. Mar. 6, 2007

ci) deleting said second data object from said database.

wherein bi) is performed in parallel with c).

48. (Previously presented) The method of claim 45 further comprising limiting

the number parallel deleting operations to a value specified by an administrator.

50. (Previously presented) The method of claim 40 wherein said data object is

formatted according to an XML format.

51. (Previously presented) An article of manufacture comprising program

code that can be executed by a machine, said software instructions organized

into;

a first module comprising first program code that when executed by said

machine perform a first method, comprising:

assigning an identifier for a data object and storing said identifier,

said data object stored in a database;

providing said identifier in response to a request made by a second

module requesting one or more identifiers of one or more

data objects to be deleted, locking said identifier;

App. No.: 10/712,472 Amdt. Mar. 6, 2007

a second module comprising second program code that when executed

by said machine performs a second method, comprising:

confirming that content of an archived version of said data object

corresponds to said data object's content;

deleting said data object.

wherein said first method also includes deleting said identifier after said

confirming.

52. (Previously presented) The article of manufacture of claim 51

wherein said first method further comprises:

receiving a request from said second software module, said

request requesting the identity of data objects marked for deletion;

responding to said request by providing to said second software

module one or more identifiers identifying a corresponding one or

more data objects marked for deletion.

53. (Previously presented) The article of manufacture of claim 52 wherein

said first method further comprises limiting the number of said one or more

identifiers to a value specified by an administrator.

- 54. (Previously presented) The article of manufacture of claim 53 wherein said first method is written to permit said first module to comprehend that said one or more data objects are within the same logical partition of said database.
- 55. (Previously presented) The article of manufacture of claim 53 wherein said second method further comprises repeatedly issuing requests for the identity of data objects marked for deletion.

App. No.: 10/712,472 Amdt. Mar. 6, 2007
